

MILLWRIGHT

DEPARTMENT: Field Services

REPORTING TO: Field Services Manager

DESCRIPTION

S&H Systems is a single-source, full-service systems integration company – delivering dependable material handling systems, software, and post-sale support since 2002. The field services department is responsible for the installation of all integrated systems at our client sites across the country.

We are seeking qualified candidates to assemble, install, dismantle, move, troubleshoot, and repair conveyor systems. Successful candidates will have experience reading blueprints and schematics as well as troubleshoot issues and perform preventative maintenance.

This position will require 100% travel in that all the work is performed at our client sites. All millwright employees are required to furnish tools and perform well in a team environment.

BASIC QUALIFICATIONS

- High School Diploma
- 2 years' experience in installing industrial conveyor components
- Knowledge of blueprints and schematics
- Solid mathematical skills
- Ability to read a tape measure
- Familiarity with rules, regulations, best practices, and performance standards

PREFERRED QUALIFICATIONS

- Associates and/or Technical Degree
- 5 years' experience in installing industrial conveyor components
- 2 years' welding experience
